

## ETH3M Ethereum Mutual Game Rules

1. ETH3M is an Ethereum-based mutual help game. All rules are automatically executed by Ethereum Smart Contracts to ensure the fairness and fairness of all participants.
2. Mutual help games raise funds according to the round. The maximum period of funds raised in each round is 24 hours. In the first round, 10 Ethereum are raised. After that, the amount of funds raised in each round is 1.6 times of the previous round.
3. If the funds are raised within the specified time, the funds raised in this round will be successful and will immediately enter the next round of fundraising.
4. Starting from the second round, if the funds raised are successful, the investor in the previous round will immediately receive the principal +10% of the investment.
5. If a certain round does not raise the required amount of funds within 24 hours, the bonus distribution plan is as follows:
  - a) A) The player with the most rounds of the last round of investment (if the investment amount is the same as the first one) will receive a 20% bonus for the total prize pool.
  - b) b) The last round of investors and the last round of investors will allocate the remaining funds pool according to the investment ratio.
  - c) C) The game will restart from the first round. In summary: as long as the next round of successful recruitment, the previous round of participants can immediately get the principal +10% of the investment
6. In summary: As long as the next round of successful recruitment, the previous round of participants can immediately get the principal of the investment + 10% of the proceeds and the investor with the largest round of investment is awarded 20% of the total prize pool.

.

## Prize pool fund calculation method

1. The amount of all user investment, deducting 3% as community maintenance funds (including development and maintenance costs, promotion costs), the rest will enter the prize pool.
2. When a round of successful recruitment is completed, 110% of the previous round of investment will be drawn from the prize pool. According to the investment ratio, all investors in the previous round will be allocated, and the remaining part will be accumulated to the next round.
3. When a round of fundraising fails, 20% of the prize pool will be allocated to the player with the largest investment amount in the last round; the remaining amount will be divided into the two rounds according to the proportion of the last round and the second round of investment. All investors. The prize pool is cleared and the game will restart from the first round.

## Invitation reward mechanism

Players can apply for their own invitation link, invite friends to play through the invitation link, and will permanently enjoy 1% of the amount of their investment (this reward comes from the community maintenance funds, will not reduce the bonus pool amount).

## Risk warning

The game has a risk of losing the principal portion and the operation should be cautious.
